

Name _____

(FUN2) The Basics - 2

Today, you will be able to:

-
-

VERIFYING SOLUTIONS:

You can verify solutions on the calculator! Use _____.

1. Is $x = 10$ the solution of the equation $3x - 7 = 4x - 15$?

2. Is $x = -7$ the solution of the equation $-x + 8 = 15$?

Find the solution. Then verify your solution on the calculator.

3. $5(x + 2) = 20$

4. $2m + 3m - 4 = -6$

5. $5x - 16 = 14 - 10x$

6. $28r - (2r - 5) = r + 40$

7. $4x - 6(x - 1) = 5x + 36 - 12x$
